

WHAT MAKES PIKET™ SEED TUBES SO GREAT

The Piket™ Extendable Universal Seed Tube has the ability to expand and contract, while allowing for even seed flow. There are no flat areas included in the design of the Piket™ Extendable Universal Seed Tubes. This ensures that there will be NO build-up of any seed-residue in the tube.

The Piket™ Extendable Universal Seed Tubes can withstand harsh conditions and have proven themselves over several years.

The Piket™ Extendable Universal Seed Tubes are made from excellent soft durable rubber.

Seed tubes made from a hard substance cannot contract or expand, which would result in breakage and uneven seed flow and then to inaccurate seed placement. Thus, the soft neoprene rubber of which the Piket™ Extendable Universal Seed Tubes are being manufactured make these the preferred and better choice.

EXTENDABLE UNIVERSAL SEED TUBE SPECIFICATIONS:

SIZES	CODE	CLOSED LENGTH	OPEN LENGTH	SIDE OPENING 1	SIDE OPENING 2
SINGLE PIPE	PST-400	400 mm	725 mm	40 - 55 mm	32 - 48 mm
ONE-AND-A-HALF PIPE	PST-560	560 mm	1000 mm	40 - 55 mm	32 - 48 mm
DOUBLE PIPE	PST-750	750 mm	1400 mm	40 - 55 mm	32 - 48 mm
PIPE EXTENDER	PST-EXT	28 mm	28 mm	38 mm	38 mm

Pipe extender - description:

The pipe extender is used to connect two pipes together.
